

EDIUS 11

Software Version 11.00.12965 – Release Notes – October 2023

New Features

EDIUS

- Added support for new license types of EDIUS 11 Pro
- Added features as below by upgrading Blackmagic RAW SDK to v3.4:
 - Added support for Blackmagic URSA Mini Pro 12K OLPF
 - Added support for Blackmagic Cinema Camera 6K
 - Added support for Blackmagic RAW files shot by Panasonic LUMIX S5II, S5IIX and GH6
 - Added support for Blackmagic RAW files shot by Fujifilm X-S20 and GFX100 II
 - Added support for automatically rotating vertical video files
- Upgraded RED SDK to v8.4.0 so that some potential issues when decoding RED files are fixed

Mync

- Added features as below by upgrading Blackmagic RAW SDK to v3.4:
 - Added support for Blackmagic URSA Mini Pro 12K OLPF
 - Added support for automatically rotating vertical video files
 - Added support for Blackmagic Cinema Camera 6K
 - Added support for Blackmagic RAW files shot by Panasonic LUMIX S5II, S5IIX and GH6
 - Added support for Blackmagic RAW files shot by Fujifilm X-S20 and GFX100 II
- Upgraded RED SDK to v8.4.0 so that some potential issues when decoding RED files are fixed

Fixed Issues

EDIUS

- Change of a sequence name is not reflect to the same sequence shown in other locations
- EDIUS does not show In/Out points of sequence clips in the Player if these points are set in Mync
- "Alpha" column in the Bin window does not show anything even if a clip has alpha channel
NOTE: Alpha channel information of clips added in previous builds of EDIUS 11 will not appear despite this fix

- When a marker set in Mync is edited with EDIUS, the marker is duplicated
- Copy and paste of a clip fails if the clip has markers
- Blu-ray/DVD Authoring fails even though "EDIUS 11 Authoring Option" is installed (Broadcast only)
- If the decimal symbol is ',' (comma) due to the Regional format of the OS, some numeric input fields will ignore decimal places after loading a QuickTitler clip or opening a project that contain a QuickTitler clip
- H.265/HEVC MOV and MP4 files exported by EDIUS are not played properly by some viewers
- When a clip is loaded to the Player, black bars appears both sides or top and bottom if the frame's height exceeds 4320 or width exceeds 8192
- The time required to start up increases
