

EDIUS X

Software Version 10.34.11471 – Release Notes – July 2023

New Features

EDIUS

- Updated device driver version list for third-party video hardware verified compatibility
 - * See [here](#) for details
 - * If you use Blackmagic Design I/O hardware, please update Desktop Video to version 12.4.2 or later

Mync

**No additional/improved feature*

Fixed Issues

EDIUS

- The color space of JPEG files shot by iPhones was set incorrectly to "sRGB" instead of "Apple - Display P3 [BT.601/Full]". This caused inaccurate colors and inaccurate results of the Primary Color Correction filter.
 - * This fix also corrects the colors and Primary Color Correction result on such JPEG files loaded in previous builds.

Mync

**No fix provided*
