

EDIUS 11

Software Version 11.00.13465 – Release Notes – January 2024

New Features

EDIUS

- Improved performance for opening projects for EDIUS 11 projects and also for older EDIUS projects saved on the same PC (for more details see [this FAQ link](#))
- Recent Project List shows projects from the network with UNC paths

Mync

** No features added*

Fixed Issues

EDIUS

- Checked out projects do not use proxies (SFDC00867855)
- When a project is created from a template, modifying a QuickTitler clip copied from the template modifies the clip in the template (SFDC00870068)
- Occasionally "Export File Path" of a job becomes empty after the export is complete
- It occasionally takes a long time between registering a job starting the job even if no other job is queued
- There are cases that an adjustment clip refers images from wrong points (SFDC00873863)

Mync

** No fix provided*
