Phone Support

Customers with service contracts can use the following numbers to call support.

United States/Americas	+1 801 222 5204
Europe, Africa & Middle East	+44 (0) 20 8867 6305
Asia (except China/Korea)	+86 21 5869 8668

Important Notification

EDIUS 9 requires SHA-2 hash algorithm code signing to be active Grass Valley hardware driver. All versions of Windows 7, Windows 8.1 and Windows 10 already support SHA-2 code signing, but if you are running Windows 7, you will need to install Security Updates.

SHA-2 code signing requires installation of Windows 7 updates in order to use Grass Valley hardware. There are following two ways to support SHA-2 code signing:

Obtain the latest update (recommended)

Obtain the latest update from Windows Update

Install two security updates

Install TWO Security Updates on Windows 7. Download stand-alone installer files from Microsoft website then run the installer. They MUST be installed in the following order.

1. [Security Update for Windows 7 for x64-based Systems \(KB3035131\)](#)
2. [Security Update for Windows 7 for x64-based Systems \(KB3033929\)](#)

If they have not been installed, installed Grass Valley hardware may not work.

Update History

The following issues are fixed or improved in this version:

EDIUS

- Burning Blu-ray disc fails at encoding process if 48kHz is not selected as audio sampling frequency
- Disc menu letter size is not adjusted when burning Blu-ray disc (SFDC00618269)
- Noisy audio is played in Blu-ray disc menu (SFDC00618012)
- EDIUS allows certain operation while opening loudness meter dialog
- EDIUS detects existing partial render file as invalid if partial rendered clip is moved
- Stabilizer effect cannot be applied for sequence clip (SFDC00622141)
- EDIUS crashes while modifying color balance in half screen and draft preview mode (Workgroup only)
- EDIUS crashes when browsing certain XDCAM clip on Source Browser (SFDC00622881)
- EDIUS freezes if certain pattern of mask applied (SFDC00621631)
- Disc Burner fails to create Blu-ray disc image in certain condition
- Clip marker disappears on certain steps (SFDC00598963)
- Luma / chroma shifts on stretching frame size to 1/2 using Lanczos 2 resampling method in 8-bit project.
- Audio bit depth mismatches in EDIUS AAF file export (SFDC00628728)
- Line noise unexpectedly appears at transition applied part (SFDC00626364)
- EDIUS cannot open certain MP3 clip (SFDC00625846)

Mync

- Footage disappears from preview screen if dpi size changed
- Edit shooting date dialog does not display correct date format due to selected region
- Modified date taken for search period is not applied in smart search
- Text cursor moves to top if a character is deleted while editing clip metadata for import
- Cannot change clip color space after restarting Mync then select same clip
- Number of asset does not appear in Storyboard tree if multiple Storyboards created
- File information pane in clip properties is not updated even after changing UI language
- Number of storyboard at sidebar does not follow settings in View
- FTP link is still created when abort uploading multiple clips
- FTP link is incorrect when user select to upload entire folder structure via FTP

Design Limitations

EDIUS & Mync

Restrictions after Uninstallation of QuickTime for Windows

The following functionality will be lost if QuickTime is uninstalled:

Still Image File Formats: Flash Pix; Mac Pict; QuickTime Image

MOV Video File Formats: M4V or some MOV file formats

MOV Video File Formats: 3GP; 3G2 (export)

Audio File Formats: MOV (other than Linear PCM and AAC); QuickTime Audio

EDIUS

Exporting AAF Files

In the [Project Exporter (AAF)] dialog box, selecting [Type: 1] in [Preset] exports files in AVI (Grass Valley HQ) instead of QuickTime (H.264).
