

# EDIUS 11

## Software Version 11.11.14007 – Release Notes – March 2024

**Important:** Please note that when updating to EDIUS 11.10 or higher, you also need to update VisTitle (Express or full version) to version 3.100. We strongly recommend using the [EDIUS 11 Setup Manager](#) to do both updates at the same time. If you do not want to use the EDIUS 11 Setup Manager, you need to install the VisTitle 3.100 Update manually ([Link to the VisTitle 3.100 update](#)).

## New Features

### EDIUS

- Optimized Multicam Workflow: Changed "Reel Name" clip property to be editable from the Properties View in the Bin or Mync window even when multiple clips are selected
- Support displaying CEA-708 closed caption contains double-byte characters
- Improved performance when multiple clips are selected in the Bin window
- General Improved Performance (by optimization of the database access)  
*\* There are precautions when downgrading to 11.10 or earlier after upgrading.  
See [here](#) for details.*

### Mync

- Optimized Multicam Workflow: Changed "Reel Name" asset property to be editable from the Properties pane even when multiple assets are selected
- General Improved Performance (by optimization of the database access)  
*\* There are precautions when downgrading to 11.10 or earlier after upgrading.  
See [here](#) for details.*

## Fixed Issues

### EDIUS

- When selecting then dragging and dropping multiple Mync assets in Library of Mync window, only one asset will be dropped
- The format settings do not appear on the "Burn to disc" dialog (SFDC00878000)
- In the German edition of EDIUS, some terms in the "Burn to disc" dialog are incorrect
- Even though a file is dragged and dropped on any folder in the Folder View, it will be added to the current folder
- Occasionally render or export fails when the Mask filter is used (SFDC00872701)

### Mync

*\*No fix provided*
