

# EDIUS 11

## Software Version 11.11.14138– Release Notes – April 2024

### New Features

#### EDIUS

- Improved UI response
- Added a progress bar to show progress if a project takes a long time to be opened
- Changed all contents of MXF/GXF exporter preset files to human-readable JSON text to allow SDK users to build MXF/GXF exporter presets without EDIUS
  - \* *Old preset files are still available.*
  - \* *Older builds of EDIUS cannot import preset files which have the new format.*
  - \* *New MXF/GXF exporter presets do not preserve destination path information that was previously preserved only in these presets till now. This change is temporary. In the future, all exporter presets will be able to include destination path information.*
- Added support for Sony BURANO
- Extended support for H.264 MXF files

#### Mync

- Improved performance when multiple assets are selected
- Added support for Sony BURANO

### Fixed Issues

#### EDIUS

- EDIUS misidentifies scan type for certain MP4 files (SFDC00879112)

#### Mync

- EDIUS misidentifies scan type for certain MP4 files (SFDC00879112)
