

# EDIUS 11

## Software Version 11.21.16813 – Release Notes – February 2025

### New Features

#### EDIUS

- Improved EDIUS startup speed
- Improved performance of opening projects which have lots of offline clips
- Improved response time to preview output when dynamically editing title clips while playing the timeline
- Improved playback performance for JPE2000 MOV clips
- Added default smart catalogs in the Mync Window:  
“Media Type - Video”, “Media Type - Audio” and “Media Type - Image”  
*\*Default smart catalogs can be modified and deleted as same as normal smart catalogs.*  
*\*Once a default smart catalog is deleted, it will not be created automatically again.*

#### Mync

- Improved playback performance for JPE2000 MOV assets
- Added a feature to playback restored assets in the Offline Asset List
- Added default smart catalogs:  
“Media Type - Video”, “Media Type - Audio” and “Media Type - Image”  
*\*Default smart catalogs can be modified and deleted as same as normal smart catalogs.*  
*\*Once a default smart catalog is deleted, it will not be created automatically again.*

### Fixed Issues

#### EDIUS

- Closed caption data cannot be exported If it is stored in a sidecar file
- Occasionally EDIUS freezes when the source file of a Quick Titler clip on the timeline is overwritten with the Quick Titler (SFDC00904682, 00906471, 00907141, 00907719)
- If only a video track of a certain clip is loaded on the timeline, trimmed then registered to the Bin, the registered Bin clip may contain video and audio tracks of incorrect lengths
- “Save as” takes extra time
- When a project is saved with "Save As", it appears that the original project is renamed instead of the new project is added in the [Projects] tree in the Mync window and Mync
- Occasionally EDIUS freezes while starting up or opening a project if a floating license is used

## Mync

- The operation area of the Preview pane appears in the wrong position depending on the display settings
- Assets in Amazon S3 buckets appear in the Offline Asset List even though they should not (Mync Cloud only)
- Audio level cannot be controlled in the Preview pane
- Zoom in/zoom out slider does not work properly
